

## Case Study

# Card Acquiring Platform Integration

The client is a card acquirer acting as a third party between merchants and banks. DataArt replaced the existing gateway connecting merchants to the acquirer host with the new one.

### Highlights:

- DataArt designed a B2B solution with a gateway adaptor
- The adaptor protects merchant investments into their infrastructure
- The new gateway can be used without any change in the existing equipment
- Switching to the new gateway was smooth and seamless for the merchants
