Experience in travel

20% of our employees (out of 5,700+) have experience in the travel and hospitality domain, with 60% at a senior level or higher. This solid talent pool allows us to create effective teams. We have more than 100 travel-related projects in our portfolio.

Reliable partner with excellence in tech

We have implemented 400+ projects, and take responsibility for ensuring quality and performance. We manage project delivery, which helps us ensure the consistency of our solutions and the quality of the services we provide. Our 95% repeat customer rate is the best proof of our success over our 26 years in operation.

Speed to market

Onboarding takes 4-6 weeks with DataArt, compared to 10 weeks with other vendors. With 30+ locations around the world, we find convenient time-zones with overlapping work hours.

Money movement experience

We have 50+ professionals (engineers) with experience in payments and more than 10 Stripe-certified architects and engineers.

Reduce costs

Save time and resources across engineering, finance, risk, and compliance. Cut down on fraud and choose a partner with 99.999% uptime. Reduce financial costs, accelerate GTM, and minimize fraud with identity verification.

Focus on business

Attract and retain more sellers and service providers, streamline marketplace management, and support multiple business models. With Stripe, you can easily distribute funds between corporate, franchise, and third-party vendors and unify online and in-person payments.

Grow your revenue with new streams and new markets

Optimize conversion at every stage of the payments funnel and minimize declines with ML-powered technology. Reach more customers, increase revenue by accepting preferred payment methods, add recurring revenue streams, and create new revenue opportunities.

Easily implemented tech

Integrate with key components such as CRM and ERP, and provide insight into data to better target sales.
